COMPARISON BETWEEN URBAN AND RURAL PRICES: JUNE 2019

FOOD BASKET PRICE MONTHLY

July 2019

Highlights

- Food and non-alcoholic beverage inflation increased from 3.2% to 3.7% during June 2019 year-on-year (y-o-y), with Headline inflation remaining unchanged at 4.5%.
 - o Sugary foods and bread & cereals were the highest food inflation contributors (y-o-y) with 8.2% and 7.3%, respectively, with meat price inflation 0.3% lower than a year ago.
- Fuel prices decreased by 96c/ℓ in July 2019 to reach R15.61/ℓ (93ULP) and R15.81/ℓ (95ULP), respectively. Diesel 500ppm decreased from R15.21/ℓ to R14.46/ℓ (-75c/ℓ).
 - o The main driver behind the price reduction in July was the large decrease in international oil prices, with the R/\$ exchange rate depreciating from R14.41/\$ to R14.62/\$.
 - o August 2019 fuel prices are predicted to increase by 7c/ℓ for petrol, with diesel expected to decrease by 20c/ℓ. This as a result of the political and economic drivers: volatility in the exchange rate on the back of National Treasury's rescue plan for Eskom, as well as the reappointment of the Reserve Bank governor for another 5-year term.
- During June 2019, the nominal cost of the NAMC's 28-item urban food basket amounted to R873.75 compared to the R874.70 reported during May 2019, resulting in a monthly percentage decline of 0.1%. When compared to June 2018, an annual (y-o-y) percentage increase of 3.1% was reported.

Introduction

The NAMC monitors food prices at retail level and releases regular authoritative reports. The Department of Agriculture, Forestry and Fisheries (DAFF) established the Food Price Monitoring Committee (FPMC) at the NAMC to track and report food price trends in South Africa; to provide explanations of the observed trends and to then advise the Department on any possible action that could be taken should national and household food security be threatened. The FPMC was established after the high food price episode of 2000/01 season. The functions of the FPMC were continued by the NAMC after the FPMC completed its work in August 2004. The NAMC issues four quarterly Food Price Monitoring Reports annually and, since 2005, also publishes an annual Food Cost Review, which documents the margins between farm and retail prices of the major food products, amongst other topics. In 2015, the NAMC began releasing a

quarterly Farm-to-Retail-Price-Spread (FTRPS) publication, which seeks to provide more insight into the factors driving commodity and food price margins. This publication, the Food Basket Price Monthly Report, came as a result of discussions with industry to keep a more frequent watch on the movements of food prices.

Overall inflation and food inflation

The June 2019 Consumer Price Index (CPI) released by Statistics South Africa (Stats SA) indicated that the headline CPI and the food and non-alcoholic beverage price indices reached 4.5% and 3.7% (y-o-y), respectively, from 4.5% and 3.2% reported during May 2019. Figure 1 show the trends in the headline CPI and food and non-alcoholic beverage inflation rates on a monthly basis, from January 2012 to June 2019.

Comparison between urban and rural prices June 2019

Table 1 compares prices of selected food items in rural and urban areas for June 2019. The food items which showed the largest price differences between urban and rural areas in June 2019 were: sunflower oil (750ml) at a difference of R3.59, Ceylon/black tea (62.5g) at R3.24 difference, and special maize meal (2.5kg) at a difference of R1.34. This indicates that urban consumers paid more for some of these food items than their rural counterparts. In other cases, however, rural consumers paid more for certain products (white sugar (2.5kg), peanut butter (400g), and full cream long life milk (1l)), than their urban counterparts.

Table 1: Comparison between urban and rural food prices (selected food items)

Product	Urban Food Prices June 2019 (R/unit)	Rural Food Prices June 2019 (R/unit)	Price difference (R/unit)
