Food Basket Price Monthly January 2020

Highlights

- Food and non - alcoholic beverage inflation increased to 3.9% during December 2019 year-on-year (y-o-y), with Headline inflation increasing to 4%.
 - Fish and bread & cereals remained the highest food inflation contributors (y-o-y) with 8.2% and 8%, respectively, with meat price inflation 2% higher than a year ago.
- January 2020 fuel prices dropped by 4c/ℓ for 93ULP to reach R15.84/ℓ (-0.25%), and by 14c/ℓ for 95ULP to reach R16.16/ℓ (-0.86%). Diesel 500ppm increased by 9c/ℓ (+0.62%) to reach R14.62/ℓ during January 2020.
 - International Brent Crude oil prices increased from \$63 to \$66.71/barrel, while the Rand strengthened against the US dollar amid hopes of the US and China trade agreement. Nationwide blackouts also hit the currency as power utility Eskom battled to keep the lights on amid several operational failures.
 - February 2020 fuel prices are predicted to drop by 8c/ℓ for 95 Octane Unleaded petrol, while 93 Octane is expected to rise by 1c/ℓ. Diesel is expected to decrease by 13c/ℓ. If tensions between the US and Iran continue, local prices are expected to be affected given the vulnerability of oil fields in the Middle East.
- During December 2019, the nominal cost of the NAMC's 28-item urban food basket amounted to R872.76 compared to the R869.94 reported during November 2019, resulting in a monthly percentage increase of 0.3%. When compared to December 2018, an annual (y-o-y) percentage increase of 2.7% was reported.

Introduction

The NAMC monitors food prices at retail level and releases regular authoritative reports. The Department of Agriculture, Forestry and Fisheries (DAFF) established the Food Price Monitoring Committee (FPMC) at the NAMC to track and report food price trends in South Africa; to provide explanations of the observed trends and to then advise the Department on any possible action that could be taken should national and household food security be threatened. The FPMC was established after the high food price episode of 2000/01 season. The functions of the FPMC were continued by the NAMC after the FPMC completed its work in August 2004. The NAMC issues four quarterly Food Price Monitoring reports annually and, since 2005, also publishes an annual Food Cost Review report, which documents the margins between farm and retail prices of the major food products, amongst other topics. In 2015, the NAMC began releasing

a quarterly Farm-to-Retail-Price-Spread (FTRPS) publication, which seeks to provide more insight into the factors driving commodity and food price margins. This publication, the Food Basket Price Monthly report, came as a result of discussions with industry to keep a more frequent watch on the movements of food prices.

Overall inflation and food inflation

The December 2019 Consumer Price Index (CPI) released by Statistics South Africa (Stats SA) indicated that the headline CPI and the food and non-alcoholic beverage price indices reached 4% and 3.9% (y-o-y), respectively, from 3.6% and 3.5% reported during November 2019. **Figure 1** show the trends in the headline CPI and food and non-alcoholic beverage inflation rates on a monthly basis, from January 2012 to December 2019.

Comparison between urban and rural prices: December 2019

Table 1 compares prices of selected food items in rural and urban areas for December 2019. The food items which showed the largest price differences between urban and rural areas in December 2019 were: Ceylon/black tea (62.5g) at R3.34 difference, sunflower oil (750ml) at a difference of R3.14, and super maize meal (2.5kg) at a difference of R1.80. This indicates that urban consumers pay 50 cents more on average, for these 11 food items. In other cases, however, rural consumers paid more for certain products including: white sugar (2.5kg), full cream long life milk (1l) and peanut butter (400g), than their urban counterparts.

Table 1: Comparison between urban and rural food prices (selected food items)
